## Latest android phones in nigeria 2018

Geoffrey Coolidge Getty Image Where is your phone now? We'll wait. I got it. If not, breathe easily. There is a simple solution. Google has announced a feature that allows you to accurately identify your phone's location by simply typing Find my phone in the search bar. That's it. When you enter it, a map will appear and you will see where your cells are hiding on the planet (there are a few caveats. As long as your device and computer are logged in to the same Google Account, you should be able to filter your phone's location. If you turn on Location Services on Android and Bluetooth is turned on, the search results will show you where (approximately) you need to get your beloved technology back. Is your phone somewhere in your home? Your phone's calling sound will be turned off at full volume even if your sound is turned off, the perfect solution for when your phone somehow ends up under the couch pillow, in the laundry basket or dishwasher. (A strange thing happened.) You could previously find missing devices online (via Android Device Manager), but this new feature makes it easy to find your valuable affiliation WAY. And last week ago, if your phone was in the house and your calling sound was off, you were out of luck. This content .com [TIME], is created and managed by a third party and imported to this page to help users provide their email address. You may be able to find out more about this and similar content in pino.io (Pocket Lint) - the world of Android phones is very different from the world of Apple phones. Apple aims to give Android the same experience across its devices with phones from different manufacturers with very different personality - and different features. That is, personal brand preferences play a big role, separate from the core Android experience. Pricing is very competitive and presents many choices. Here's our rundown of the best Android phones you can buy and why they are expected to be your attention. Our pick of all the best smartphones including ApplePocket-lintOnePlus 8 Pro squirrel\_widget\_233185The OnePlus 8 Pro is definitely the company's most complete smartphone so far and one of the best Android phones out there. It has a large, brilliant display, long-lasting, fast charging battery, IP68 waterproof, a great main and wide angle camera on the back, and even fluid and lightweight software. There are a few things that stop this device from being perfect - the color filter camera seems to be only for quad claims, but the telephoto camera is not class-leading and not all see the benefits of a 120Hz screen. But overall, the OnePlus 8 Pro offers a true flagship experience that offers everything you can hope for, and it's still less than that big name competition. OnePlus 8 Pro Review: Perfect Pursuit Pocket-lint Samsung Galaxy S20 +squirrel\_widget\_184580The Samsung Galaxy S Series has long been the flagship series to beat in the Android world. And Samsung is still commanding a big chunk of the market and it's easier to recommend buying in 2020. Big names have a big experience. The amazing display at the front dominates the space available, just because the punch camera is a slight distraction from the other glorious display. Inside, you get a performance that matches all the forces you can hope for. It is fast, fluid, goes all day and has one of the most versatile cameras available on any smartphone. Samsung Galaxy S20+ Review: Bunch Picks? Pocket-lintGogle Pixel 4asquirrel\_widget\_317382It may not have a flagship processor under the hood, but it's great to be able to get an almost complete Pixel experience at just a small part of the cost of a full Pixel 4. This phone is about lowering price barriers, allowing you to reach its excellent Pixel camera without the need for a hefty wad of cash. There are AI Smarts that are used to run as smoothly as software and animations are all expected from more powerful phones. Google Pixel 4a review: The small but mighty Pocket-lintOnePlus has climbed the price ladder with its standard and professional model phones for years Nord squirrel\_widget\_305633After, all sports flagship Qualcomm processors, OnePlus Nord is the first device from a company that doesn't. Instead, Nord joins a midrange phone with a Snapdragon 765 chipset under the hood and provides a very competitive experience against its price tag. It has 5G, lots of storage, big and fast displays, fast charging, and a fluid and clean software experience. Even if the other camera is just a distraction, its main camera is also good. As affordable phones go, Nord is easily one of the best phones in its price range. OnePlus Nord Powersquirrel\_widget\_184710The Review: Who needs an expensive flagship anyway? It shows that the G brand is still the king of budget smartphones. It sits right on the budget phone territory and has a big screen, expandable storage, clean and fluid software and enough power for it to be used every day. It doesn't have a little weak camera, slow Wi-Fi and NFC, but the battery life is absolutely phenomenal for smartphones and improves the Moto G7 in most departments - screen, design and storage. If you're shopping on a budget: Moto G8 Power is a class-leading affordable phone. Moto G8 Power Review: Big Battery Boss Pocket-lint Huawei P30 is a great place to pay some attention that we recommend Huawei P30 Pro squirrel\_widget\_147530It Smartphone. It has huge power, amazing battery life and even compares it to a new launch, a camera system that leads the class. But there is nothing to avoid the fact that Huawei is still facing some uncertainty. The P30 Pro has Android 10, but there is a question of what will happen in the future, so think of yourself as a warning. Huawei P30 Pro Review: Quad camera crushes competitive pocket lint oppo Pro squirrel\_widget\_192445Oppo quickly adjusted to the western market. It quickly adapts the software to match more closely with what the European market prefers from Android phones, and now its ColorOS user interface is much better than the previous mess. The Oppo Find X2 Pro features a stunning 120Hz OLED screen that delivers at resolution, color and refresh rate, but with powerful hardware and solid battery innings it takes almost anything you throw. The versatile triple camera system is too impressive, even if night mode doesn't win the competition. Huawei's presence looks more suspicious in Europe, so it looks as if Oppo has come out fighting to take its place in the flagship phone space. X2 Pro Problem? That the OnePlus 8 Pro exists for less money. Oppo Finds X2 Pro Review: Shining Star Pocket Lind Xiaomi 9T Pro squirrel\_widget\_168098When It comes to Android phones that offer good value for money, Xiaomi is a nova. The Mi 9 was a cracked phone, but the Mi 9T Pro, despite its confusing name, is not only cheaper to move things further. If the money is tight, it is impossible to ignore, giving you the power of the mainstay, a decent battery and a camera to stand up to rivals. The display is great and there are no real signs that this is a cheap phone. But MIUI software is not the best. Xiaomi Mi 9T Pro Review: Incredible Value Pocket-lintXiaomi Redmi Note 9squirrel\_widget\_261834The Xiaomi Redmi Note 9 offers more for your money, with impressive hardware, design and power that leaves many rivals in the dust. The camera system is probably a little overseed, the speakers don't provide the best sound quality and the software brings a lot of bloaton. Redmi Note 9 offers premium design, along with excellent battery life, plenty of power, and great value for money. Redmi Note 9 Review: New Affordable Champion?Pocket-lint Samsung Galaxy Note 10 +squirrel\_widget\_328377The Galaxy Note has always been about one thing: S Pen.S Pen will receive some upgrades, but the real update of the Note 10 family is it is the creation of two sizes that follow in the latest note 20 range. Note 10+ is not dramatically different from the old S10+ except for S Pen and 5G and has been replaced by Note 20 Ultra, but it is still possible in every sense. It's a great phone with a lot of power, awesome display and S Pen.Samsung Galaxy Note 10+ reviews: S Pen Rule is a more affordable 5G phone, how to make a hot-up of the market to provide Xiaomi Mi Litesquirrel\_widget\_281310As Pocket-lintXiaomi Mi rule tenLight offers increase the scale. There is a great OLED display, the main camera is very capable, has a decent battery life, and has a fingerprint scanner that lacks a display. Missing microSD expansion, the software is a little bloded and the notch looks a little outdrance, but this phone offers a class-leading specification of price and everything runs smoothly. Ignore names for a moment and focus on important things: Mi 10 Lite provides class-leading specifications in a completely attractive package. Xiaomi Mi 10 Lite Review: 5G Heavyweight Writing by Chris Hall. Hall.
